Abstract

Study with a focus on "education and training of the Holy Prophet (PBUH)", with the aim of educating Vpyshynh familiar with it from the perspective of the Prophet (PBUH) has been calculated. This article is a scientific-promotional review is.
Education has long been considered by Imams and elders. According to the Holy Quran and the traditions of religious leaders and Imams (AS), the better and the most appropriate model of "Prophet of Islam (PBUH)" is. Certainly, following the Prophet in the field of education can man achieve pure life in personal and social behavior, temporal and eternal existence with God's help it.
In today's world, ethics and value systems and moral life shaken by loosening sacred principles is threatened, accordingly to achieve a prominent place in this world and the hereafter, the moral and educational traditions of Prophet Mohammad (PBUH) and his opinion in this regard, is essential.

Keywords: Teaching, training, the Prophet (PBUH)

Introduction:

According to some experts, education for centuries been based solely on philosophical and ethical considerations, today, despite the dominance of human knowledge in the fields of biology, sociology and psychology of education, it was apparent that point Are. (Glory)
Human beings as creatures when "good person" who always has a moral and educative man, otherwise such dangerous creatures that utilizes human intelligence, secure and prosperous world destroy and burnKshd.az dirt and blood requirements of morality, good behavior, good manners in society and socialize. In this context, the Prophets and Imams (PBUH), the order has been emphasized. Reflecting the

attitude in the life of the Prophet (pbuh) and the Imams of Ahlul-Bayt (AS), can be applied to moral actions and measures indicated in the Muslim community.

According to Islam, human beings are the social and educational excellence, growth and prosperity of society takes place in the context of his moral. The ethical and educational recommendations specific to the emergence of the talents and abilities of man, has to offer.

Surely we can say that the teachings of training Imams (AS), who all stages of human life, from birth until death include, clear way to reform society and to achieve an Islamic utopia. On the same Therefore, the basic objective of this study was to investigate and explain the conduct of educational, moral virtues and greatness of Hazard Prophet (pbuh). (Tabatabai)

Theoretical basis of research:

"Education" is to teach. [The process of] teaching, students just wide spreading to his brain (as) warehouse is a data set, it poured, but in education, [this] is not enough. Today, the failure to count the teacher may just be aimed at a range of information, data and formulas in the brains of students shed, barn, where he and his mind is like a pond where the amount of water was be. The purpose of the teacher should be higher (ie, must) develop students intellectually and gives independence and initiative to revive him; in fact, teacher, fire clamp off. The difference is that you want to fire out of the oven and pour it to the hot oven and baked in the wood and wood together, you fire off clamp will get. So under the wood and firewood fire to be ignited this little low and he ignited the oven with firewood. (Motahari, pp. 18-19).

Comes. Hence we can say that education has many forms including: physical education, intellectual education, religious education, moral education, sex education, emotional education, training Atfyf mystical training, civic education, social education, etc. (Motahari)

Education: the nature of man and the attitude of scholars and thinkers or different schools about this issue, different positions in relation to the definition, purpose or nature of education has caused.

Education word, the root of the "paste" and literally means, flourish now, Brkshydn, large and high-quality or price of the (Glory).

According to the martyr Motahhari's view, "education means fostering internal talent and the actualization of the object lies, is" (Motahari).

Training in four areas examined:

A) The spiritual moral education

Education, with context and different aspects, like the intellectual, emotional, social, and so on. The most important aspect of education, spiritual education is the opinion of most scholars, is training on all aspects of the foundation after the other. This forms the basic essence demeanor religious person and as the most important factor in creating differentiation from other areas of education, religious education will be discussed. Based in spiritual education, "God" and the order of God centeredness, the orientation of all human actions and behavior in line with the criteria and standards is divine. This type of education, which includes education and spiritual dimension of man's relationship with God is allowing man to attain nearness to God is growing and finally, emphasized the prophets and Imams (AS) and the honorable in all life scenes of the utmost importance to nurturing the spiritual dimension of man.

B) Individual moral education

Great sayings of the Prophet on the acquisition of knowledge and the importance it has been narrated. Here the narrative point that well reflects the status and majesty of the universe from the perspective of the Holy Prophet (pbuh). One of the supporters of the Prophet (PBUH) and said, If the funeral of my body or be present in the House with a scientist in me which of the two is more like you.to worship God in a thousand days and a thousand nights and fasting and giving alms to the poor thousand dinars Gzarandn thousand pilgrims and thousands of war in God's presence in the higher virtue. Where it appears to the presence in the House of God? Do you not know that the life and vitality of the heart to learn divine knowledge and ignorance is death and destruction the heart of man? "(Nishapur, 1420 AH).

C) Economic moral education

Islam, the religion, the religion of the world and the hereafter. School and sacred religion of Islam, along with recommendations to reform the Hereafter, in regulating the world also has a special order. This shows that Islam followers indifferent about the economic situation there and provide invaluable solutions, has demonstrated towards economic prosperity.

In this regard the faith in the educational dimensions of the world economy, especially in the cost of living is focused on the observance of moderation and balance.

Undoubtedly one of the most important motives of Islam on the recommendation of the Shkvfasazy economy and benefit of sufficient finances, the importance of a favorable economy in the context of strengthening and reforming the Hereafter is piety.

The Holy Prophet (PBUH), along with all the spiritual dimension and its elite, transcendent aspect of education have left the economy. He had a special emphasis on the economy. Their time to organizing the efforts deployed and summoned its followers to use it.

D) social education

Humans are social creatures and communicate with people, can never developmental stages, reach maturity and prosperity in the field of human success depends on attracting friend. For this reason, everyone in the world loves to penetrate human heart, the other coordinator with the vote because success in a social interaction, the best option and the influence in the hearts of people conquest their hearts.

Following are some of the indicators of social education based on the theory and practice of the Holy Prophet Muhammad (pbuh) is checked.

1. Ehsan and help the needy

Serve the people of the most useful educational practices to attract hearts because humans are innate, self-interested and intrigued by who knows who he is good or node opens to the problems of his life.

One of the tasks of moral education of every person in society is to try to meet the needs of their fellow men. Meet the needs of a Muslim and wish him not only reward above and beyond the twenty-Hajj (Hurr Ameli, 1409 AH)

2-good companionship:

Good companionship, appropriate behavior and serve the people of God, the orders of the Qur'an, the Prophet (pbuh) and our infallible leaders.open and happy face on Myaransanyt and faith with others and also Bgshaynd.dr's problems in communication between communities and individuals deal with each of the words and behavior of the different. Good deal too much emphasis on the sacred religion of Islam and the Hi-the Thyt- that when dealing with each order. (Asbhany, 1998)

Research Background

Nopasand Asil et al in a study named "studying the relation between talent management and organizational performance have concluded Among the activities related to talent management and quality of service and innovation in the provision of services, there is a significant relationship and The necessary measures in order to retain talent in the organization has the most impact on the quality of services and Attracting top talent to the most impact on organizational innovation is increasing.

The results showed that the combination of ICT and human capital increases the efficiency of enterprises.

Research methodology

This article is a scientific-promotional review is.

Conclusion:

Based on the material aspects of life, most attention has been on Ast.anbya' divine spiritual elements, in particular, the prophet (pbuh), the best educational practices taught his followers put on. They transcendental life can be described as the most successful educational patterns in human history With the survey was conducted, it was determined, moral education pattern of the Holy Prophet (PBUH), due to

two factors; one in the person of the Prophet (pbuh), and another on law and religion that he brought from God to guide humanity, is the most appropriate and best educational model.Radio, television, newspapers, magazines, etc., and the Sire of morality prophetic teachings trying to be inclusive in the community.

Practical suggestions:

provide adequate training to:

Although Prtla in the world today, negligence and negligence led to nothing but failure, but it is necessary education in less time and may, but the best and most effective practices so that students make the most of it them. On the other hand training, especially tasks that must be presented to them in addition to the extent that students learn better and more successfully achieve its ultimate goal, the growth of other aspects of his personality also with immediate effect. This means that if the mind towards education students only, without education and leisure focus, he has a worn, tired, nervous, withdrawn and become one-dimensional and it should, will not flourish. So try as much as possible, needs and capacity to provide each student to teach him and ask him.

Wise asked what time to begin your training? Hakim said twenty years before the birth:

So accurate, child-rearing begins even years before the birth of the child, that parent to child bearing, context and guidance in their own growth and to prepare for the parents themselves.

Parents and older children's behavior is modeled on. The house of worship and religious people who are committed, it will usually have children. Parenting advice and persistence in preaching is not to repeat. Nothing operation does not work. When children see their father or mother at home is bad language, will have a sharp tongue, then it must be the cause of many ills that exist in our children is to understand the behavior and actions. If a father wants his son to prayer, the first time the trophy count, does not need to be coerced him into this work. You do not need to speak and preach at all in this case. Without saying anything, should come to fruition. With believed to worship his work in spite of her child.

strengthen the confidence of children:

_Tjarb Successful increase Kids:

One of the most important factors in strengthening self-esteem in children and adolescents, particularly young shy or unsuccessful, the frequency of its successes in various activities. So it is necessary for its educational programs and activities that are expected to be prepared in such a way that the attempt to show that they managed to do it explains.

_Kvdkan And adolescents shy and lacking confidence, boost your social skills need extraordinary.

Ability to establish and maintain positive relationships with others increases the feeling of social value and therefore the confidence of children and adolescents.

Especially teachers, parents and schools should strive to Kids timid and weak with a significant number of peers and classmates were familiar, establish rapport and interaction. Establish and maintain a friendly relationship, for development of personality and vitality of the young people is absolutely essential.
